

# SOHAR INDUSTRIAL PORT CONTAINER TERMINAL B

Our scope of works for this project included the construction of the terminal pavement (190,000M<sup>2</sup>), access roads (10,000M<sup>2</sup>), concrete duct backs, runway beams for gantry crane and container bases.

In addition, we also completed the design and construction of the following ancillary buildings (5,000M<sup>2</sup>).

- 4 storey administration building
- 2 storey mess building
- PEB workshop
- Generator & transformer building
