

LPIC - EPC 3 PROJECT PACKAGE III BUILDING WORKS

Liwa Plastic Industries Complex (LPIC) EPC 3 NGL Extraction Project in Fahud is a natural gas extraction plant, and one part of six core components within the LPIC Steam Cracker project. Our scope of work comprises the construction of 9 buildings including 3 substations, 2 satellite instrument handling buildings, main administration building. Warehouse and maintenance workshops and auxiliary buildings having a floor area of approximately 17,000 m².

The scope includes the J&I fit out and all MEP and fire protection. Once the 6 projects have been completed, it is anticipated that 350 operators will be required to manage the facilities, as well as 150 technicians. The indirect employment effect is expected to create more than 1,200 jobs in the local area.
