

This prestigious project was completed within a 6-month period at the new Muscat International Airport. Douglas OHI provided a premium quality fit-out whilst enforcing health and safety procedures, sustainable use of material and taking care of the environment.

Spread over an area of 6,000 square meters, the Muscat Duty Free at new passenger terminal is like a shopping mall with an airport attached to it.

The end result is a testament to one of the hallmarks of Douglas OHI's approach to every project they undertake – namely attention to detail and a desire to deliver the best possible outcome for the client, not to mention an impressive experience for members of the public.
